

BOSCHROBERT BOSCH
(AUSTRALIA) PTY. LTD.
A.B.N. 48 004 315 628**PRODUCTION TEST SPECIFICATION**FOA Barra Body Electronics Module
High and Low Series**F005 VP 0067**

Page 3 of 29

Issue	ECR Number	Alteration	By	Valid From	Checked
4	V000969	To support Version 11 Software Sect9.1: For mt watchdog - Temic Test, change "Set BEM_MainFlags_ ubl address bit 6" to "Set BEM_MainFlags_ ubl address bit 1" Sect 12.3: Update checksum for Production Programmer of standalone Motorola Microprocess for Version 11 software to \$89FC60 (8bit) and \$454F7ED3 (16 bit). Sect15: Update checksum address \$0938 for Version 11 software to \$1B1C using Flasher if pre-programmed with Version 10 software using Flasher. - Update checksum for Version 11 software to \$1027 if pre-programmed with Version 11 software using the production programmer with no previous version programmed. - Reduction in Final Test time can be achieved by storing serial number in addresses \$09B0 to \$09B3 (previously 09B4). Furthermore address \$09B4 to \$09C8 can be left unprogrammed (previously cleared to \$FF) Sect 17.3: RAM Memory Map changed BEMMainflag_ ubl to identify more clearly that the variable at \$FD4A is 16bit.	EGE3-JEV	28/05/02	EGE3/SM
3	V000911	To support Version 10 Software Sect4.4: Step DTC Logging Added. Sect4.8: Verifying EEPROM Map Added. Sect4.5: Downloading Default values to EEPROM Modified such that there is no need for Tester to verify EEPROM against given EEPROM Map. Sect 8: Remove Boot Tailgate Release Solenoid Option since used only for E265, not Barra. Sect 12.3: Update checksum for Production Programmer of Motorola Microprocessor FOR Version 10 software. Sect15: Update checksum for Version 10 software. Added checksums relating to Final Tester and Production programmer.	EGE3MS	8/04/02	EGE3/JEV
2	V000871	Sect 12.3: Added Checksum created by Production Programmer of Motorola Microprocessor. Sect15: The EEPROM Memory Map was only providing data specific to Final Tester. This has now been updated to include the ICT. Also, the Memory Map has been further extended to define all EEPROM memory, including unallocated areas and restricted areas as would have been required by a Memory Map Specification. Update checksum for Version 9 software. Added checksums relating to Final Tester and Production programmer. Sect7&15: Typographical errors picked up by TEF fixed	EGEJEV	20/03/02	EGE3JEV
1		New Document - Version 8 Software			

EGE3RP
